

Video Streaming Solution for Leading Telco and Digital Media Company

Video Streaming Solution on private network

Customer Situation

- The customer is a leading telecom and broadcaster in Papua New Guinea, they plan to extend the Broadcast TV to the Multiscreen Users
- They were looking forward to stream the video on the telecom's private network

Challenges

- Commedia had to deal with the existing complex online network.
- The video streaming was expected to happen from on Internet Cloud
- Had to maintain optimal costs to accommodate the customer's budget constraints.
- Sizing of the Users.

Actions Taken

- Commedia did a complete study of the network diagram, the existing work flow and equipment.
- Additional focus was given to project management and a system integration solution.
- We had to recommend a solution and the BOM gaps at the site
- Solution Based on Harmonic VS7000 and WOWZA.

Results and Benefits

- Successful implementation of the Streaming Solution.
- A comprehensive system integration of video streaming completely scalable
- A systematic timeline execution of the project performed.
- Commedia's access to the Video Head-end expertise demonstrated.
- Streaming across all formats and across all devices demonstrated
